I used a steel tape and magnetic compass in the establishment of the bearing trees. I used 18° East declination. I attached a brass washer marked OPLS 2219 to the BT blaze. The distance is to a 60d spike driven into the root crown at the right side of the new bearing tree. I used a Leica 1200 GPS in the establishment of the iron pin accessories. Basis of bearing is as per Survey Number 011-2009.
