NARRATIVE

This survey was done at the request of Doug Knight. The purpose of this survey is to monument and document the proposed adjustment of the common line with the adjacent ownership along the North line of the Southwest quarter of the Southeast quarter of Section 14. The line will be adjusted from the aliquot description to a line along an ancient fence line slightly North of the aliquot line. I use Survey Number 037-1993 as the basis for the subdivision of Section 14. The existing fence was in place at that time and located by that survey. The fence line has been removed along this line since 1993. Some rock jacks and down wire remain. I use the ties made to the fence as it existed in 1993 to reestablish the fence line. I have prepared legal descriptions for this adjustment to which this survey will be referenced. I find no other unusual conditions on this survey.
