South and 0.29 ft. West of true proportionate position

This survey was ordered by Dick Granger on behalf of Forest Recovery Incorporated. Mr. Granger instructed us to survey and set the controlling corners for the East line of the Southwest Quarter of the Northwest Quarter, and the South line of the Northeast Quarter of the Northwest Quarter of Section 32, Township 4 South, Range 38 East. I find that Survey Number 020-2003 set the exterior of the Northwest Quarter of Section 32. I found the corners as shown on the survey and accept the positions of the controlling corners. I then compute the positions of the North 1/16 between Sections 31 and 32, the West 1/16 between Sections 29 and 32, the Center North 1/16 and the Center West 1/16 of Section 32 by single proportion and midway between the controlling corners, in order to establish the NW 1/16 corner position. I drive a straight line Westerly, from the Center North 1/16 to the North 1/16 corner between Sections 31 and 32, and drive a straight line Northerly from the Center West 1/16 to the West 1/16 corner between Sections 29 and 32, and place the Northwest 1/16 corner at the intersect of the two lines. I find no unusual conditions with this survey.
