- / / Record information of GLO contract number 201 by John A. Hurlburt

**NARRATIVE**

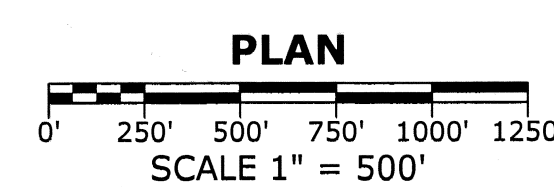

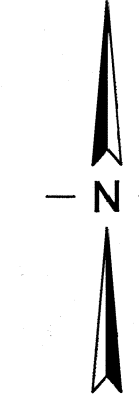

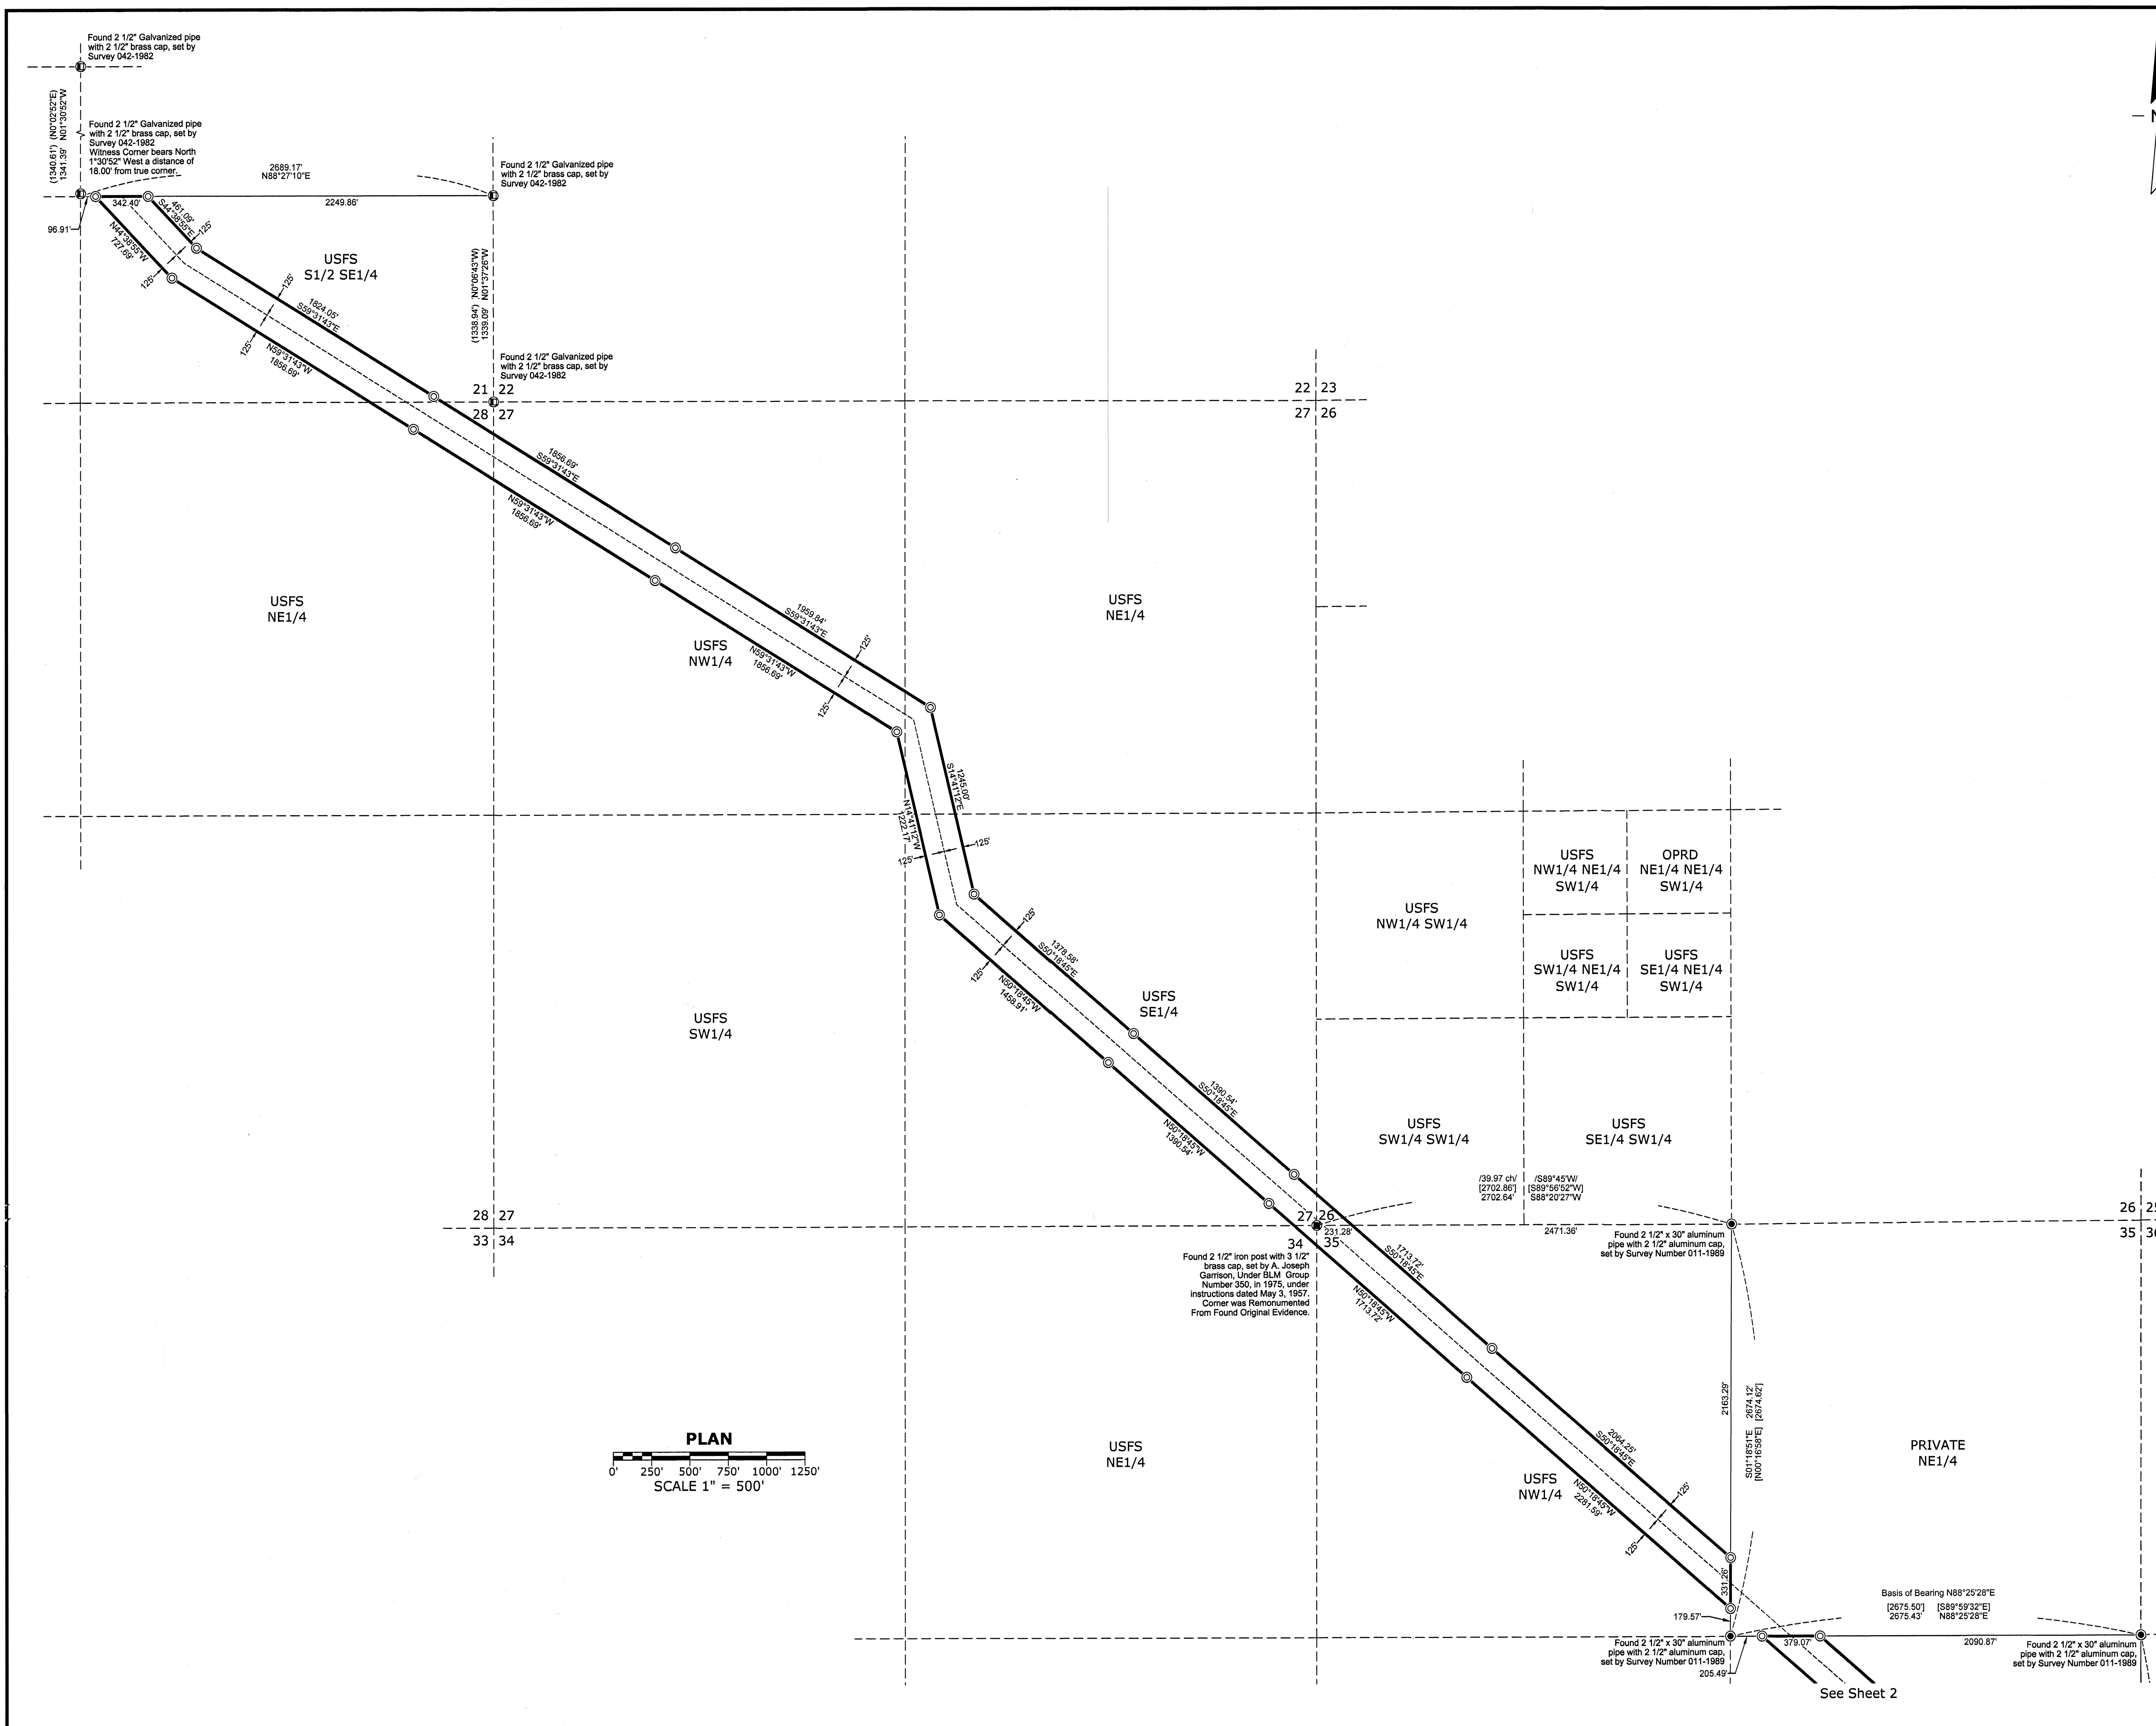

This survey was performed to meet the requirements of the Right-of-Way Marking Plan for the Boardman to Hemingway Transmission Line Project. The purpose of this survey was to monument the Idaho Power Company Right-of-Way where it enters and exits United States Forest Service (USFS) lands within Sections 21, 26, 27, 28, 34, and 35, Township 3 South, Range 36 East, W.M., and Section 1, Township 3 South, Range 36 East, W.M., Union County, Oregon.

During the course of this survey, numerous monuments were recovered, including those set during Union County Surveys No. 042-1982, 011-1989, and 027-1996, as well as monuments referenced in Corner Records.

All monuments found during the survey were accepted as representing their respective corner positions. These recovered monuments were determined to be consistent with record information and were held as controlling evidence of the United States Forest Service boundary.

Using the said monuments as the basis for boundary control, the intersections of the Idaho Power Company Right-of-Way with the USFS boundary were identified. In accordance with the Right-of-Way Marking Plan, 5/8-inch by 30-inch iron rods with plastic caps were set at appropriate locations to monument these intersections and to provide additional delineation along the Right-of-Way corridor.

All monumentation shown hereon reflects field-observed evidence and record data as depicted on the accompanying Right-of-Way Boundary Monumentation Map
